

Overview:

Founded in 1990 as a Child Rights Organization, Stairway has developed a multi-faceted approach to address abuse and neglect of children over nearly 3 decades.

Essential for the organization's results in terms of both quality and scope lie a strategic use of creative expressions, like theatre and film productions, at the core of the therapeutic interventions as well as in the extensive advocacy and capacity building program.

Crucial for Stairway's expansive reach at national and international level is the strategic use of developing and training child protection networks with broad representation from government as well as non-governmental institutions.

Location:

Puerto Galera and Manila, Philippines.

Our Partnership:

We support Stairway to further reinforce its role among the national and regional stakeholders addressing the issue of child sexual abuse.

We also invest in Stairway to strengthen their core team, since they are our key partner in the Philippines and together we are building the Tondo Community Initiative and designing a social innovation space in the heart of Manila.

Our relationship with Stairway is multi-pronged and truly epitomizes the type of partnership based on mutual trust and respect that we seek to form with other organizations.
